

# **Bin Loader 5000**

**THE ORCHARD BIN LOADER FROM BEN WYE ENGINEERING!**

The Bin Loader 5000 loading with the axle dropped.

## **BIN LOADER FEATURES**

Ben Wye Engineerings Bin Loaders are of heavy duty construction and are fully hydraulic. The bin runners are lowered using a clever hydraulic controlled drop axle to fork under the bins which are pulled up the runners using a hydraulically controlled chain that is bi-directional for loading and unloading.

Bin Loaders can be pushed or pulled by tractors, the hydraulics are controlled through the tractor remotes and the long wheel base gives good operator control.

Bin loaders come standard in 4 or 5 bin trailers and can be custom made to suit any style of bin.
